RE: Lifestyles Center Development; Saratoga Technology + Energy Park®

Dear Mr. Khosrova:

Thank you for including GLOBALFOUNDRIES in the development of the PON for a Lifestyle Center at STEP. GLOBALFOUNDRIES places a premium on the health and wellbeing of its employees, who operate in a dynamic and challenging environment. The company sees significant potential value for its employees, both in the proximity of high quality fitness opportunities as well as various convenience retail offerings. Potential PON applicants who are interested in further information on the company's interests may inquire via NYSERDA.

GLOBALFOUNDRIES fully supports your efforts to attract and construct a Lifestyles Center at STEP. It would certainly provide an attractive asset, and we would be pleased to focus on this among the many benefits of locating Fab2 at LFTC and leasing offices at STEP. I also anticipate encouraging our employees to take advantage of this amenity.

In the short time that GLOBALFOUNDRIES has been involved in New York State, we have had very beneficial collaborations with several NYSERDA projects and hope to continue this relationship.

Sincerely,

Steve Groseclose
Director, Risk Management, Sustainability & Real Estate

Re: Lifestyles Center Development
Saratoga Technology + Energy Park[®] (STEP[®])

Dear: Mr. Khosrova:

As you are aware, the Luther Forest Technology Campus has undertaken the largest economic development project in the history of New York State. Through this project, more than 5 miles of roads have been constructed, utility infrastructure is being expanded, and GlobalFoundries, the world's second largest semiconductor manufacturer, has begun construction of its state-of-the-art, 1.3 million square foot manufacturing facility. Once complete, GlobalFoundries anticipates that more than 1,400 employees will work at the campus. With the manufacturing plant under construction, we continue to receive a great deal of interest from businesses interested in relocating to Saratoga County to support the fab. The future of Saratoga County looks bright, even in these economic times.

With construction underway at both the Luther Forest Technology Campus and our adjoining neighbor, the Saratoga Technology + Energy Park, we believe there will be significant growth in the coming years that will benefit both of these parks. Of immediate need is a retail-type building that offers various amenities to both the employees at the Campus and at STEP. Such an establishment will be an asset to both the Campus and STEP, with employees of both parks taking advantage of the various amenities such a building would offer.

LFTCEDC fully supports NYSERDA's efforts to construct a Lifestyles Center at STEP. We anticipate that this asset will be used when marketing the Campus to potential tenants and will encourage the employees at the Campus to take advantage of this amenity.

Sincerely,
