

REFRIGERATORS AND FREEZERS

High efficiency refrigerators and freezers save an estimated 35% to 54% a year in energy costs over standard units.

Benefits:

- Reduced energy usage
- Money savings
- Better food storage

Image credit: Enodis USA

High efficiency solid-door refrigerators and freezers are built to save you energy and money with the most efficient components and high-quality construction features, including:

- Advanced controls
- Better insulating walls for better food storage
- ECM evaporators and condenser fan motors
- Hot gas anti-sweat heaters
- High efficiency compressors

Enjoy significantly-reduced energy consumption and savings on your utility bills with high efficiency refrigerators and freezers. Significant incentives for high efficiency models are available from the New York State Energy Research and Development Authority (NYSERDA).
